JILLO WARIO

FULL-STACK DEVELOPER

Nairobi, Kenya | +254 795 847 919 | willywario0@gmail.com
LinkedIn | GitHub | Portfolio

SUMMARY

Full-stack developer with over five years of experience shipping production web applications — React, Next.js and TypeScript on the client, Node.js, Express and REST APIs on the server. Currently building a multi-surface e-commerce marketplace — admin portal, storefront and landing page — against a Laravel API. Strengths in framework migrations, rendering and authentication debugging, data-processing systems, and turning design specifications into stable, maintainable interfaces.

EXPERIENCE

Digital Realm Entertainment — Kigali, Rwanda **Apr 2026 – Present**
Full-Stack Developer

- Build and maintain Pixel Realm V2, a Next.js and TypeScript e-commerce marketplace spanning an admin portal, storefront and public landing page, working across the frontend and its Laravel REST API backend.
- Migrated the platform's rich-text editing from React Quill to TipTap and carried out a major Next.js version upgrade, modernizing the codebase without regressing existing features.
- Diagnosed and resolved authentication-flow defects, server-side rendering hydration errors and theme-flash issues, improving first-load stability and perceived performance.
- Ship new storefront and admin surfaces from design specifications, including a pricing section and documentation pages.
- Authored a data-protection and security audit checklist covering both the Next.js frontend and the Laravel backend, alongside structured code-quality and UI/UX audits of the codebase.

MIBM — Nairobi, Kenya **Sep 2024 – Dec 2024**
IT Support Intern

- Built an in-house tech inventory management system with Next.js and Express — a multi-user platform tracking hardware, employee assignments, item status and system audit logs.
- Monitored system performance metrics and cleared network bottlenecks to maintain service availability.
- Installed and configured network hardware and provided day-to-day technical support to company staff.

TenziLabs — Nairobi, Kenya **Sep 2022 – Sep 2023**
Junior Frontend Developer

- Maintained and extended a production React and TypeScript web application, safeguarding feature stability and code quality across releases.
- Implemented new UI features in React and TypeScript using modern component libraries, working directly with designers to improve the user experience.
- Delivered the company website (tenzi.africa) and TenziBiz (biz.tenzi.africa), a business management web application, both built with Next.js.
- Investigated and fixed defects affecting application performance and reliability.

NHIF — Nairobi, Kenya **Jan 2022 – May 2022**
Software Developer

- Designed and built a Python data-processing system using object-oriented principles to cleanse large Excel datasets, stripping duplicate and invalid ID records before pushing them to the main database over REST APIs (GitHub).
- Maintained the system on cloud infrastructure, supporting high availability and scalability as record volumes grew.
- Resolved defects and implemented modifications in response to changing data-validation requirements.

PROJECTS

Hanawari — hanawari.store **Next.js**
Independently designed and built an e-commerce store for a homemade Kenyan salsa brand, covering storefront, product catalog and transactional email (Resend, with a verified sending domain).

Personal Portfolio — willy-j-wario-portfolio.netlify.app **React**
Personal site showcasing selected frontend work and technical projects.

EDUCATION

KCA University — BSc, Software Development **May 2019 – Dec 2024**
Coursework: Advanced Databases, Advanced Web Development, Network Programming, Operating Systems, Artificial Intelligence Programming, C Programming, Computational Thinking

Moringa School — Software Engineering **Nov 2023 – May 2024**
Coursework: JavaScript, React, Python, Flask, HTML, CSS

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, C#, SQL
Frontend	React, Next.js, React Native, HTML5, CSS3, component and UI libraries
Backend & APIs	Node.js, Express, .NET, REST API design and integration
Databases	MongoDB, Firebase
Tools & Platforms	Git, Yarn, npm, Linux, cloud platforms
